COMPANY PROFILE

REN GROUP is a Design and Construction Group, experts in the field of turnkey construction of production facilities, industrial facilities, vegetable storage facilities, shopping centers, hypermarkets and other industrial and civil construction facilities of any degree of complexity.

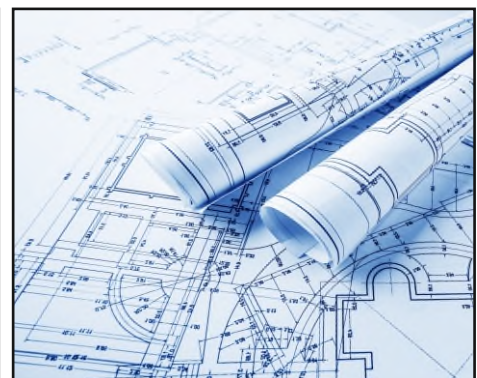

The Company conducts designing, construction and capital improvements of industrial facilities of any degree of complexity with the competent on-site design and construction supervision and our extensive experience is the basis for successful project management.

REN GROUP guarantees professional competence, deadline management and a creative approach to each project, accompanied by a rigorous technical audit and constant quality control.

Scope of Activity

Construction of facilities for various industrial and civil construction purposes (shopping centers, pavilions, production facilities, storage, exhibition, agricultural, administrative, public facilities, etc.) including the performance of a general contractor functions.

Implementation of general construction (construction site preparation, foundation, floors, ceilings, roofing, facade, insulation, finishing work, monolithic work, flooring, manufacturing and installation of metal structures of any complexity, glazing of buildings, etc.

Ren Group is a specialised provider of services in the field of reconstruction projects design and development and other engineering services in the field of construction metal structures in Kazakhstan. The high level of expertise of our specialists allows us to solve any engineering problems in the design of the most complex and unique facilities for construction sites with seismic rating up to magnitude 10 inclusively. The majority of facilities we had designed have been constructed, their reliability is time-tested that is a guarantee of the quality and long-term safety of the provided metal structure designing for the clients. To date, over the entire period of the provision of services, our engineers have developed more than 120 designs for Kazakhstan, the CIS republics. We are entrusted with the development of designs by government agencies, the largest companies in Kazakhstan, because they are confident in the expertise of our employees and the timely development of design documentation. We offer unconventional unique solutions for the developed metal structures, taking into account the scientific justifications of these solutions for various types of loads. This approach saves clients from additional estimations and inspections, greatly simplifies the state-out and/or state expertise assessment. The experience of our experts without complaints and the high degree of their responsibility to clients give reason to believe that the facilities currently being designed will be reliable during their many years service.
